

CHEMGENE HLD₄L

High Level Laboratory Surface Disinfectant

The introduction of CHEMGENE HLD₄L continues the trend of leading edge biosecurity technologies established by Medimark Scientific and represents significant developments in disinfectant technology.

Our scientists established another 'first' by combining enhanced active ingredient molecules with micelle cleaning technology to provide a unique carrier/delivery system for disinfectant products.

The HLD₄ Formula is being supported through BPD and REACH and contains no substances classified as dangerous to health.

CHEMGENE HLD₄L combines a formidable array of microbiological credentials with the enhanced facilities of faster and more effective anti-pathogenic activity.

Safety, Security and Simplicity have been enhanced too, allowing CHEMGENE HLD₄L to offer economic dilutions for virtually all environmental challenges.

CHEMGENE HLD₄L is manufactured in accordance with Quality Management System ISO 9001 and is biodegradable under OECD conditions.

TRUSTED INFECTION CONTROL
